Subject Index

ADCC lysis of human erythrocytes sensitized with rhesus alloantibodies. IV. Characterization of anti-D sera which are inactive in ADCC (BARCLAY *et al*), 293.
Afibrinogenaemia, congenital, platelet aggregation occurs in, despite the absence of fibrinogen or its fragments in plasma and platelets, as demonstrated by immunoenzymology (SORIA *et al*), 503.
Agarose gel method: its usefulness in assaying factor VIII inhibitors, evaluating treatment and suggesting a mechanisms of action for factor IX concentrates (COOTS *et al*), 735.
AIDS, infectivity and health care workers (KERNOFF), 207.
Anaemia, autoimmune haemolytic, successful response to intravenous immunoglobulin in (MACINTYRE *et al*), 387.
Anaemia, congenital dyserythropoietic, unclassified type of, with prominent peripheral erythroblastosis (BETHLENFALVAY *et al*), 541.
Anaemia, idiopathic refractory sideroblastic, is the HLA-linked haemochromatosis allele implicated? (SIMON *et al*), 75.
Anaemia, non-benign sickle cell, in western Saudi Arabia (ACQUAYE *et al*), 99.
Anaemia, severe aplastic, cyclosporine and graft failure following bone marrow transplantation for (HOWS *et al*), 611.
Anorexia nervosa and involuntary starvation, marrow cell necrosis in (SMITH & SPIVAK), 525.
Aspirin, low-dose enteric coated, cumulative antiplatelet effect of (JAKUBOWSKI *et al*), 635.

B-cell activation in human plasma cell dyscrasias (LEVINSON *et al*), 437.
B-lymphocytes, leukaemic, regulation of human peripheral blood BFU-E growth *in vitro* by (NAJMAN *et al*), 643.
Bone marrow cells, canine, repopulating potential of: differences between large and small cells separated by velocity sedimentation (RAGHAVACHAR *et al*), 33.
Bone-marrow transplantation, allogeneic, graft-versus-host disease prophylaxis with anti-T-cell monoclonal antibody OKT3, prednisone and methotrexate in (FILIPOVICH *et al*), 143.
Book reviews
Human Leukaemias: Cytochemical and Ultrastructural Techniques, 204.
Leukaemia Reviews International, 205.
L'Héparine—Fabrication, Structure, Propriétés, Analyses, 393.
Migratory Blood Cells, 392.
Practical Haematology, 6th edn, 392.
The Leukaemias—Epidemiological Aspects, 393.
Burkitt lymphoma associated antigen, a monoclonal antibody against, has an anti-P^k red blood cell specificity (FELLOUS *et al*), 559.

Cetiedil, effects on the oxidative metabolism of activated polymorphonuclear leucocytes (KOHZAKI *et al*), 531.
CML blast crisis with low dose ara-C, treatment of (DI RAIMONDO *et al*), 773.
Colony formation by primitive haemopoietic progenitors in cocultures of bone marrow cells and stromal cells (GORDON *et al*), 129.

DDAVP in a non-haemophilic patient with an acquired factor VIII inhibitor (VICENTE *et al*), 585.

Emperipolesis of granulocytes within megakaryocytes (DE PASQUALE *et al*), 384.
Epstein-Barr virus infection, persistent, associated with monosomy 7 or chromosome 3 abnormality in childhood myeloproliferative disorders (STOLLMANN *et al*), 183.
Erythrocytosis, erythropoietin-dependent, heterogeneity of: case report in a child and synopsis of primary erythrocytosis syndrome (KULKARNI *et al*), 751.

Factor VII congenital deficiency, carrier detection in (MARIANI *et al*), 687.

Factor VIII concentrates, eight lyophilized, multimeric analysis of (HILL & ENAYAT), 201.
Factor XIII deficiency, congenital: type I and type II disease (GIROLAMI *et al*), 375.
Fibronectin C in acute leukaemia (NALLI *et al*), 198.
Filterability of red blood cells, is it important to separate leucocytes and platelets before measuring? (BURKHARD *et al*), 377.

Gammopathy, biclonal transient expression of a second monoclonal component in two forms of (BAST *et al*), 91.
Gene triplet *Rw W Ph* controls murine haematopoiesis (LOUTIT *et al*), 219.
Giant platelet syndromes, kinetics, *in vivo* redistribution and sites of sequestration of indium-111-labelled platelets in (HEYNS *et al*), 323.
Glucose-6-phosphate dehydrogenase activity, a sensitive cytochemical method for, in individual erythrocytes. II. Further improvements of the staining procedure and some observations with glucose-6-phosphate dehydrogenase deficiency (VAN NOORDEN & VOGELS), 57.
Granulocytes, human, the red cell antigens A, B, D, U, Ge, Jk3 and Yt^a are not detected on (GAIDULIS *et al*), 659.

Haemochromatosis, idiopathic, and the haemochromatosis allele (SIMON), 1.
Haemophiliacs, English, relationships between blood product exposure and immunological abnormalities in (LEE *et al*), 161.
Haemophiliacs, Swedish, life expectancy in (NOUR-ELDIN), 774.
Hb C trait in an area of southern Spain, incidence of (DE PABLOS), 584.
Helper T cell lymphoproliferative disease, chronic (VAN-SLYCK *et al*), 382.
Hepatitis, non-A non-B, high risk of, after a first exposure to volunteer or commercial clotting factor concentrates: effects of prophylactic immune serum globulin (KERNOFF *et al*), 469.
HLA-identical sibling marrow engraftment, lack of correlation between nucleated bone marrow cell dose, marrow CFU-GM dose or marrow CFU-E dose and the rate of (ATKINSON *et al*), 245.
Hypoplasia, chronic marrow, and anti-platelet immunity, the kinetics of unmatched and HLA-matched ^{111}In-labelled homologous platelets in recipients with (PETERS *et al*), 117.

Idiopathic thrombocytopenic purpura, adult chronic, suppressor cell function after intravenous gammaglobulin treatment in (DELFRAISSY *et al*), 315.
Idiopathic thrombocytopenic purpura, refractory, treated with cyclosporine (KELSEY *et al*), 197.
Indomethacin treatment, effect of, on lymphocyte PHA reactivity in healthy controls and patients with lymphoma and sarcoidosis (UNDERHILL & VALDIMARSSON), 423.
Interferon is effective in hairy-cell leukaemia (WORMAN *et al*), 759.
Irradiation, fractionated total body, cytogenetic studies on recipients of allogeneic bone marrow transplants after (SCHMITZ *et al*), 239.
ITP, chronic, platelet-associated complement in (KURATA *et al*), 723.

Langherans cells, host, persistence of, following allogeneic bone marrow transplantation: possible relationship with acute graft-versus-host disease (PERREAULT *et al*), 253.
Leukaemia, acute lymphoblastic, a myelodysplastic syndrome preceding (BERNEMAN *et al*), 353.
Leukaemia, acute lymphoblastic, DNA and RNA determination in 111 cases of, by flow cytometry: correlation of FAB classification with DNA stemline and proliferation (SUAREZ *et al*), 677.
Leukaemia cells, chronic B-lymphocytic, prognostic value of B-cell mitogen-induced and spontaneous thymidine uptake *in vitro* in (JULIUSSON *et al*), 429.
Leukaemia cells, human, reactivity of rat monoclonal antibody CAMPATH-1 with, and its possible application for autologous bone marrow transplantation (HALE *et al*), 41.
Leukaemia, chronic granulocytic, in accelerated phase, autografting for (REIFFERS *et al*), 770.
Leukaemia, chronic myelogenous, the molecular biology of (GALE & CANNANI), 395.
Leukaemia, hairy-cell (CAWLEY & WORMAN), 213.
Leukaemia, hairy cell, and nephrotic syndrome (SCHOFIELD *et al*), 389.
Leukaemia, hair-cell, interferon is effective in (WORMAN *et al*), 759.
Leukaemia, hypoplastic acute myeloid, with No. 8-trisomy, low-dose cytosine arabinoside regimen induced a complete remission with normal karyotypes in a case with: *in vitro* and *in vivo* evidence for normal haematopoietic recovery (TAGAWA *et al*), 449.
Leukaemia patients, two chronic myelogenous, treated with leucocyte interferon, suppression of clonal evolution in (TALPAZ *et al*), 619.
Leukaemia, Philadelphia chromosome-negative chronic myelogenous: a morphological reassessment (PUGH *et al*), 457.
Leukaemia, prolymphocytic, treated by leukapheresis with relief of respiratory symptoms (SHOAF *et al*), 766.
Leukaemic transformation of engrafted bone marrow cells (SMITH *et al*), 415.
Lupus anticoagulant in pregnancy (HOUGIE *et al*), 392.
Lymphocytosis, chronic, due to the expansion of granular lymphocytes (PANDOLFI *et al*), 771.
Lymphoma, non-Hodgkin's, bad prognosis, massive chemotherapy with autologous bone marrow transplantation in 50 cases of (PHILIP *et al*), 599.
Lysozyme gene expression, control of, in differentiating HL-60 cells (POLANSKY *et al*), 7.

Monoclonal gammopathies, cytochemistry in the differential diagnosis of (PORTERO *et al*), 768.
Myelodysplastic syndromes in childhood: three case reports (VAN WERING *et al*), 137.
Myelodysplastic syndromes, prognostic factors in: importance of initial data on peripheral blood counts,

bone marrow cytology, trephine biopsy and chromosomal analysis (TRICOT *et al*), 19.
Myelofibrosis, endothelial cell proliferation in (REILLY *et al*), 625.
Myelofibrosis, idiopathic, plasma fibronectin in (VELLENGA *et al*), 583.
Myeloma, multiple, in a pair of monozygotic twins: the first reported case (JUDSON *et al*), 551.
Myeloproliferative disorders and secondary thrombocytosis, platelet membrane glycoprotein abnormalities in patients with (CLEZARDIN *et al*), 331.

Neutropenia, cyclical, and T_8 lymphocyte mediated stimulation of granulopoiesis (SMITH *et al*), 481.
Neutrophil phagocytosis of complement coated and IgG coated erythrocytes, activation by platelet release products (SAKAMOTO & OOSHIMA), 173.
Neutrophils, absence of ABH antigens on (DUNSTAN *et al*), 651.

Paroxysmal nocturnal haemoglobinuria, deficient natural killer cells in: studies of lymphoid cells fractionated by discontinuous density gradient centrifugation (YODA & ABE), 669.
Phagocytes, mononuclear, from blood, studies on the locomotory behaviour and adhesive properties of (LACKIE *et al*), 567.
Picolinic acid, the iron-chelating agent, enhances transferrin receptors expression in human erythroleukaemic cell lines (TESTA *et al*), 491.
PL^{A1} typing, antenatal, and detection of GP IIb–IIIa complex (KAPLAN *et al*), 586.
Plasmin and plasminogen activators, the influence of the polyphenols of cider on (OGSTON *et al*), 705.
Platelet suppressive therapy in clinical medicine (PRESTON & GREAVES), 589.
Platelet transfusions, immunological aspects of (MURPHY & WATERS), 409.
Prekallikrein activator (PKA), standardization of: the 1st International Standard for PKA (Kerry *et al*), 345.
Prostacyclin analogue ZK 3674, platelet hyperaggregability occurring during prolonged continuous intravenous infusions of (YARDUMIAN *et al*), 109.
Prostacyclin, an ultrastructural study of stored human platelets after washing using (READ *et al*), 305.
Protein-energy malnutrition, serum immunoreactive erythropoietin and erythropoiesis in (WICKRAMASINGHE *et al*), 515.
Protoporphyrin accumulation by mitogen stimulated lymphocytes and protoporphyrinogen oxidase activity in patients with porphyria variegata and erythropoietic protoporphyria: evidence for deficiency of protoporphyrinogen oxidase and ferrochelatase in both diseases (SIEPKER & KRAMER), 65.

Serum crosslinked fibrin and fibrinogen/fibrin degradation products in disorders associated with activation of the coagulation or fibrinolytic systems (HUNT *et al*), 715.
Sickle cell disease, homozygous, a genetic marker for elevated levels of haemoglobin F in? (WAINSCOAT *et al*), 261.
Sickle cell–haemoglobin C disease and sickle cell–beta thalassaemia, haematological change in: a cohort study from birth (STEVENS *et al*), 279.

T cell leukaemia virus type I associated antigens, human adult, antibodies to, in Swedish leukaemia patients and blood donors (BLOMBERG & FÄLDT), 555.
Thalassaemia genes in Peninsular Arabs (WHITE *et al*), 269.
Thalassaemia intermedia, red cell kinetics in (PIPPARD), 765.
Thalassaemia, transfusion-dependent, a prospective trial of young red cells in 48 patients with (MARCUS *et al*), 153.
Thrombin inhibition, the importance of for the expression of the anticoagulant activities of heparin, dermatan sulphate, low molecular weight heparin and pentosan polysulphate (OFOSU *et al*), 695.
Thrombocytopenia, adult immune, changes in platelet immunoprotein levels during therapy in (BALL *et al*), 631.
Thrombocytopenia, autoimmune, platelet associated complement components (PAC_{3c} and PAC_{3d}) in patients with (HEGDE *et al*), 49.
T-lymphocytes, activated, a regulatory role of, on human megakaryocytopoiesis *in vitro* (GEISSLER *et al*), 233.
Transferrin, transferrin receptor, and iron-binding sites on human placental and duodenal microvilli, ultrastructural localization of (PARMLEY *et al*), 81.
